

Ph.D. Kinesiology: Specialization in Sport Management

This specialization prepares students for teaching and research careers in sport management. Graduates are trained for post-doctoral appointments and positions in universities, industry, and research institutions. The program prepares students to conduct research in applied and basic areas of sport management. Emphases in the applied areas are in organizational and group diversity; the under-representation of women and ethnic minorities in sport organizations; organizational effectiveness; organizational structure and strategy; organizational change; sport marketing; and consumer behavior. Emphases in the basic areas focus on relational demography; intergroup processes; and sport consumer behavior. Specific areas of research correspond to those of the sport management faculty.

The Center for Sport Management Research and Education, and the laboratories subsumed under that entity—the Laboratory for the Diversity in Sport and the Sport Marketing Laboratory—provide support to the sport management program. Research in these entities focuses on applied issues in the university athletic context and on diversity issues within organizations for sport and physical activity, respectively. In addition to the work in the laboratories, supplementary experiences are available with various sport entities, including the Department of Athletics, the Department of Recreational Sports, and professional sport organizations/tournaments.
